INFORMATION:

Global Index Medicus (GIM) new platform

Dear colleagues, WPRIM NJSC and focal persons,

The new GIM portal was launched by the WHO Library in October 31, 2019. It provides improved features increasing better search results. GIM allows federated search in the five WHO regional indices including WPRIM. You can download the poster from the GIM website and shared with your other colleagues. For more information and other promotional materials, GIM website can be accessed at www.globalindexmedicus.net. Please help to encourage and maximize the use of GIM and WPRIM.

Western Pacific Region Index Medicus (WPRO)

The Western Pacific Region Index Medicus (WPRIM) is the regional bibliographic index of medical and health journals published by the Member States of the Western Pacific Region. This is the Region's contribution to the Global Index Medicus (GIM) initiative which aims to extend to all the benefits of the knowledge that is essential to the fullest attainment of health. WPRIM allows free, public access to research and publications that may not be available through other popular medical indexes.
